Foreword

Personal Health Choices is a joint publication of the Center for Health Information Analysis (CHIA) and the Nevada Department of Health and Human Services, Division of Health Care Financing and Policy. This report presents specialty care hospital inpatient discharge billing records data for 11 common medical and surgical diagnoses by MS-DRG (Medicare Severity Diagnosis-Related Groups) as reported by 21 of Nevada's non-acute care (specialty) hospitals that discharged patients within the period of 2011 to 2015.

These data are available through the standard Uniform Billing form, which is utilized by hospitals to bill for their hospital charges. These data include patients who were admitted to a hospital as an inpatient, but do not include patients who were treated and released from the emergency room. It includes information about patients discharged from non-federal hospitals in Nevada. These data identify billed charges, not the actual payments received by the hospital.

The data were compiled by CHIA using information from inpatient hospital billing records. This information was gathered and analyzed as part of a contractual agreement between the Department of Health and Human Services and the University under the authority granted in Section 439B of the Nevada Revised Statutes. CHIA audits the data and requests corrections when errors are found. It is not possible to detect all errors. CHIA is not responsible for errors that cannot be found by an audit.

Personal Health Choices
Twenty-Eighth Edition, 2011-2015
Published June, 2016

The Great Seal of the State of Nevada is a large, faint watermark in the background. It features a circular border with the text "THE GREAT SEAL OF THE STATE OF NEVADA" and "FOR OUR COUNTRY" at the bottom. The center contains a landscape with a mountain, a river, a plow, and a sheaf of wheat, surrounded by stars.

Introduction

This twenty-eighth edition, Book 2 of Personal Health Choices compares 21 of Nevada's specialty care hospitals with respect to 11 common medical diagnoses and surgical procedures, defined by Medicare Severity Diagnosis Related Groups (MS-DRGs: see below). The definitions to all DRGs can be found on the narrative page for each DRG. Each diagnosis and procedure in this publication may be based on an individual DRG or multiple related DRGs.

THE DIAGNOSIS RELATED GROUP (DRG) SYSTEM

Diagnosis Related Group (DRG), is a classification system that is based on principal and secondary disease diagnoses, medical and surgical procedures, complications, comorbidities (coexisting conditions), age and discharge status. The DRG system is complex in its construction, and is based upon documentation in the patient's medical record. DRGs are divided into 25 exclusive categories referred to as major diagnostic categories (MDCs). DRGs enable hospitals to recover the appropriate reimbursement for services rendered, evaluate the quality of care and assist in evaluating utilization of services. The DRGs classify patients with similar utilization of hospital resources and length of stay patterns. Each DRG represents the average resources needed to treat patients grouped to that DRG compared to the national average of resources to treat all Medicare patients. Hospitals are reimbursed at a flat rate based on the theory that patients with similar illnesses undergoing similar procedures will require similar care. The primary outcome of the DRG system is the more efficiently a hospital delivers care, the greater its operating margin will be.

INFORMATION LEVEL

Personal Health Choices is intended as a source of information regarding the billed charges of hospitals in Nevada, and should not be construed as a definitive guide for selecting a hospital in order to receive inpatient medical care. The financial information in this report is based on billed charges rather than the amount actually collected on discharged patients per DRG. Billed charges and collected charges can differ significantly. This report provides the reader information about one component of healthcare pricing - inpatient hospitalization. Hospital outpatient services as well as professional physician and other non-hospital inpatient ancillary healthcare services are not covered in this report.

CREDIT DUE: Google Web was extensively used to obtain definitions for medical terms. This can be accessed by typing, 'define: term' in the Google search box. Also <http://medical-dictionary.thefreedictionary.com/>

Factors

The information provided in this report is formatted so as to present narrative and tabular data on the first page and detailed tabular data on the second. This report covers a five-year trend line for DRG-related data. DRGs are sometimes broken down by age factors and/or presence of comorbidity. Comorbidity or comorbid conditions are defined as two or more coexisting medical conditions.

The first page of each selected DRG presents gender and age breakdowns of the overall hospital inpatient population, factored by the total number of discharges, average length of hospital stay and average billed charges. The age categories consist of 0-17, 18-35, 36-49, 50-64, and 65+. These age categories were selected to best illustrate the impact of the disease diagnoses and medical and surgical procedures on the populations affected. The narrative information on the first page for each DRG is based on the available data and may contain information on specific diagnoses and surgical procedures involved in the treatment of the patient. These diagnoses and procedures may not always be directly related to the primary ailment. The second page examines specific hospitals in Clark, Washoe and the Rural counties with regard to total discharges, average length of stays, and average billed charges.

It should be noted that, when comparing hospitals to average length of stay and billed charges, information based on small numbers of cases cannot provide a reliable statistical base upon which information can reflect a given hospital's experience. Further, physician charges (including those of surgeons) are normally separate from hospital charges, except in rural areas where some physician services -- such as radiology, anesthesia, and laboratory tests -- may be included in the hospital charges.

The Center for Health Information Analysis (CHIA) receives patient bill records directly from all the hospitals. These data are audited and if errors are found a resend is requested. The audit includes missing or out of range fields as well as statistical mixes of fields such as payer, gender, and race. Although CHIA does everything it can to validate the data, there are some types of errors that cannot be audited. The hospitals are typically very good at creating data and coding so these errors are a rarity.

ANOMALIES: For DRGs 207-208, for year 2011 and hospital Progressive, there is one case with over a million dollar charge. This is most likely an error in the data that was sent to CHIA.

Progressive Hospital changed their name to Las Vegas - AMG Specialty Hospital, LLC in the middle of 2015. Data is split between the two names for 2015. The total number of hospitals in this report is 21 although there 22 are shown in the data pages because of this.

SPECIALTY CARE HOSPITALS

Hospital Name	Address	Phone	Beds	County
Carson Tahoe Continuing Care Hospital (LTAC)	775 Fleischmann Way, Carson City, NV 89703	(775) 445-7786	29	Carson

881	Depressive Neuroses	19	11-12
884	Organic Disturbances & Mental Retardation	19	13-14
885	Psychoses	19	15-16
894-897	Alcohol/Drug Abuse Or Dependence	20	17-18
945	Rehabilitation With Complications	23	19-20
946	Rehabilitation Without Complications	23	21-22

Respiratory Diagnosis With Ventilator (207-208)

Diagnoses: that frequently accompanied Respiratory Diagnosis With Ventilator were: 1) Attention to gastrostomy (V551), 2) Attention to tracheostomy (V550), 3) Pneumonia, organism unspecified (486), 4) Encephalopathy, unspecified (34830), 5) Diabetes mellitus without mention of complication, type II or unspecified type, not stated as uncontrolled (25000), 6) Anemia, unspecified (2859), 7) Acute kidney failure, unspecified (5849), 8) Urinary tract infection, site not specified (5990).

Definitions: **Gastrostomy:** A surgical opening into the stomach. **Tracheostomy:** An operation to make an opening into the trachea. **Pneumonia:** Inflammation of the lungs, usually due to infection with bacteria, viruses, or other pathogenic organisms. **Encephalopathy:** Disease, damage, or malfunction of the brain. **Anemia:** A condition marked by a deficiency of red blood cells or of hemoglobin in the blood, resulting in pallor and weariness; diminishes the capacity of the blood to carry oxygen. **Acute kidney failure:** Occurs when illness, infection, or injury damages the kidneys. Temporarily, the kidneys cannot adequately remove fluids and wastes from the body or maintain the proper level of certain kidney-regulated chemicals in the bloodstream. **Urinary tract infection:** Microbial infection, usually bacterial, of any part of the urinary tract; may involve the parenchyma of the kidney, the renal pelvis, the ureter, the bladder, the urethra or combinations of these organs.

Osteomyelitis (539-541)

Diagnoses: that frequently accompanied Osteomyelitis were: 1) Pressure ulcer, lower back (70703), 2) Pressure ulcer, stage IV (70724), 3) Anemia, unspecified (2859), 4) Unspecified essential hypertension (4019), 5) Urinary tract infection, site not specified (5990), 6) Unspecified osteomyelitis, ankle and foot (73027), 7) Atrial fibrillation (42731).

Definitions: **Pressure ulcer:** An area of skin that breaks down when something keeps rubbing or pressing against the skin. **Pressure ulcer, stage IV:** The pressure ulcer has become so deep that there is damage to the muscle and bone, and sometimes to tendons and joints. **Anemia:** A condition marked by a deficiency of red blood cells or of hemoglobin in the blood, resulting in pallor and weariness; diminishes the capacity of the blood to carry oxygen. **Hypertension:** High blood pressure. **Urinary tract infection:** Microbial infection, usually bacterial, of any part of the urinary tract; may involve the parenchyma of the kidney, the renal pelvis, the ureter, the bladder, the urethra or combinations of these organs. **Osteomyelitis:** An infection of the bone or bone marrow. **Atrial fibrillation:** An irregular and often very fast heart rate. The heart's two upper chambers (the atria) beat chaotically and irregularly - out of coordination with the two lower chambers (the ventricles) of the heart.

Diabetes (637-639)

Diagnoses: that frequently accompanied Diabetes were: 1) Unspecified osteomyelitis, ankle and foot (73027), 2) Ulcer of other part of foot (70715), 3) Unspecified essential hypertension (4019), 4) Peripheral vascular disease, unspecified (4439), 5) Other and unspecified hyperlipidemia (2724), 6) Polyneuropathy in diabetes (3572), 7) Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage I through stage IV, or unspecified (40390).

Definitions: **Osteomyelitis:** An infection of the bone or bone marrow. **Ulcer:** A lesion through the skin or a mucous membrane resulting from loss of tissue, usually with inflammation. **Hypertension:** High blood pressure. **Peripheral vascular disease:** Circulation disorders that affect blood vessels outside of the heart and brain. **Hyperlipidemia:** An abnormally high concentration of fats or lipids in the blood. **Polyneuropathy:** The most common form of a group of disorders known as peripheral neuropathy, is caused by damage to peripheral nerves (defined as all nerves beyond the brain and spinal cord). Peripheral nerves travel from the spinal cord to muscles, skin, internal organs, and glands. In polyneuropathy, many nerves throughout the body malfunction at the same time. **Chronic kidney disease stage V or end stage renal disease:** A progressive loss in renal function over a period of months or years. Stage 5 being the final stage of kidney failure that is marked by the complete or nearly complete irreversible loss of renal function.

Renal Failure (682-684)

Diagnoses: that frequently accompanied Renal Failure were: 1) Debility, unspecified (7993), 2) Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage V or end stage renal disease (40391), 3) Pneumonia, organism unspecified (486), 4) Diabetes mellitus without mention of complication, type II or unspecified type, not stated as uncontrolled (25000), 5) Urinary tract infection, site not specified (5990), 6) Acute kidney failure with lesion of tubular necrosis (5845), 7) Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage I through stage IV, or unspecified (40390), 8) Congestive heart failure, unspecified (4280), 9) Anemia in chronic kidney disease (28521).

Definitions: **Debility:** The state of being weak or feeble; infirmity. **Chronic kidney disease stage V or end stage renal disease:** A progressive loss in renal function over a period of months or years. Stage 5 being the final stage of kidney failure that is marked by the complete or nearly complete irreversible loss of renal function. **Pneumonia:** Inflammation of the lungs, usually due to infection with bacteria, viruses, or other pathogenic organisms. **Urinary tract infection:** Microbial infection, usually bacterial, of any part of the urinary tract; may involve the parenchyma of the kidney, the renal pelvis, the ureter, the bladder, the urethra or combinations of these organs. **Acute kidney failure:** Occurs when illness, infection, or injury damages the kidneys. Temporarily, the kidneys cannot adequately remove fluids and wastes from the body or maintain the proper level of certain kidney-regulated chemicals in the bloodstream. **Lesion:** Any abnormal change involving any tissue or organ due to disease or injury. **Tubular necrosis:** The death of cells in the small tubules of the kidneys as a result of disease or injury. **Congestive heart failure:** Inability of the heart to keep up with the demands on it, with failure of the heart to pump blood with normal efficiency. **Anemia:** A condition marked by a deficiency of red blood cells or of hemoglobin in the blood, resulting in pallor and weariness; diminishes the capacity of the blood to carry oxygen.

Septicemia Or Severe Sepsis (870-872)

Diagnoses: that frequently accompanied Septicemia Or Severe Sepsis were: 1) Sepsis (99591), 2) Unspecified septicemia (0389), 3) Pneumonia, organism unspecified (486), 4) Urinary tract infection, site not specified (5990), 5) Acute kidney failure, unspecified (5849), 6) Acute respiratory failure (51881), 7) End stage renal disease (5856), 8) Diabetes mellitus without mention of complication, type II or unspecified type, not stated as uncontrolled (25000), 9) Atrial fibrillation (42731).

Definitions: Sepsis: The presence of bacteria (bacteremia), other infectious organisms, or toxins created by infectious organisms in the bloodstream with spread throughout the body. **Septicemia:** Systemic disease caused by the spread of microorganisms and their toxins through circulating blood; formerly called "blood poisoning". **Pneumonia:** Inflammation of the lungs, usually due to infection with bacteria, viruses, or other pathogenic organisms. **Urinary tract infection:** Microbial infection, usually bacterial, of any part of the urinary tract; may involve the parenchyma of the kidney, the renal pelvis, the ureter, the bladder, the urethra or combinations of these organs. **Acute kidney failure:** Occurs when illness, infection, or injury damages the kidneys. Temporarily, the kidneys cannot adequately remove fluids and wastes from the body or maintain the proper level of certain kidney-regulated chemicals in the bloodstream. **Acute respiratory failure:** A sudden inability of the lungs to maintain normal respiratory function. The condition may be caused by an obstruction in the airways or by failure of the lungs to exchange gases in the alveoli. **Chronic kidney disease stage V or end stage renal disease:** A progressive loss in renal function over a period of months or years. Stage 5 being the final stage of kidney failure that is marked by the complete or nearly complete irreversible loss of renal function. **Atrial fibrillation:** An irregular and often very fast heart rate. The heart's two upper chambers (the atria) beat chaotically and irregularly - out of coordination with the two lower chambers (the ventricles) of the heart.

Depressive Neuroses (881)

Diagnoses: that frequently accompanied Depressive Neuroses were: 1) Depressive disorder, not elsewhere classified (311), 2) Suicidal ideation (V6284), 3) Cannabis abuse, unspecified (30520), 4) Tobacco use disorder (3051), 5) Unspecified essential hypertension (4019), 6) Alcohol abuse, unspecified (30500), 7) Anxiety state, unspecified (30000), 8) Personal history of noncompliance with medical treatment, presenting hazards to health (V1581), 9) History of physical abuse (V1541).

Definitions: **Depressive disorder:** Any of a number of conditions characterized by one or more depressive episodes - major DD, depressed mood - dysthymic disorder and adjustment disorder with depressed mood, and those that do not fit the criteria of other conditions, aka, DD not otherwise specified. **Cannabis abuse:** The abuse of any of several mildly euphoriant, intoxicating hallucinogenic drugs, such as ganja, hashish, or marijuana prepared from various parts of this plant. **Tobacco:** Herb of South American origin, *Nicotiana tabacum*, which has large ovate to lanceolate leaves; leaves contain 2-8% nicotine and are source of smoking tobacco, chewing tobacco, and snuff. **Hypertension:** High blood pressure. **Anxiety:** A multisystem response to a perceived threat or danger. It reflects a combination of biochemical changes in the body, the patient's personal history and memory, and the social situation. **Noncompliance:** Failure or refusal to conform to or follow rules, regulations, or the advice or wishes of another.

Organic Disturbances & Mental Retardation (884)

Diagnoses: that frequently accompanied Organic Disturbances & Mental Retardation were: 1) Mood disorder in conditions classified elsewhere (29383), 2) Suicidal ideation (V6284), 3) Attention deficit disorder with hyperactivity (31401), 4) Cannabis abuse, unspecified (30520), 5) Tobacco use disorder (3051), 6) Social maladjustment (V624), 7) Alcohol abuse, unspecified (30500), 8) Oppositional defiant disorder (31381), 9) History of physical abuse (V1541).

Definitions: **Mood disorder:** Any of a group of psychiatric disorders, including depression and bipolar disorder, characterized by a pervasive disturbance of mood that is not caused by an organic abnormality. **Attention deficit disorder:** A syndrome, usually diagnosed in childhood, characterized by a persistent pattern of impulsiveness, a short attention span, and often hyperactivity, and interfering especially with academic, occupational, and social performance. **Cannabis abuse:** The abuse of any of several mildly euphoriant, intoxicating hallucinogenic drugs, such as ganja, hashish, or marijuana prepared from various parts of this plant. **Tobacco:** Herb of South American origin, Nicotiana tabacum, which has large ovate to lanceolate leaves; leaves contain 2-8% nicotine and are source of smoking tobacco, chewing tobacco, and snuff. **Social maladjustment:** Maladjustment without manifest psychiatric disorder, such as that occasioned by an inability to cope with social situations. **Oppositional defiant disorder:** A recurring pattern of negative, hostile, disobedient, and defiant behavior in a child or adolescent, lasting for at least six months without serious violation of the basic rights of others.

Psychoses (885)

Diagnoses: that frequently accompanied Psychoses were: 1) Insomnia, unspecified (78052), 2) Unspecified psychosis (2989), 3) Substance abuse in family (V6142), 4) History of physical abuse (V1541), 5) Tobacco use disorder (3051), 6) Posttraumatic stress disorder (30981), 7) Major depressive affective disorder, single episode, unspecified (29620).

Definitions: **Insomnia:** A sleep disorder that is characterized by difficulty falling and/or staying asleep. **Psychosis:** A symptom of mental illness rather than the name of a medical condition itself. Broadly speaking, it means a loss of contact with reality, and generally there are two types of psychiatric disorder that produce psychotic symptoms: schizophrenia, and mood disorders such as bipolar disorder. **Substance abuse:** Maladaptive pattern of use of a drug, alcohol, or other chemical agent that may lead to social, occupational, psychological, or physical problems. **Tobacco:** Herb of South American origin, Nicotiana tabacum, which has large ovate to lanceolate leaves; leaves contain 2-8% nicotine and are source of smoking tobacco, chewing tobacco, and snuff. **Posttraumatic stress disorder:** An anxiety disorder affecting individuals who have experienced or witnessed profoundly traumatic events, such as torture, rape, military combat, or a natural disaster, characterized by recurrent flashbacks of the traumatic event, nightmares, anxiety, fatigue, forgetfulness, and social withdrawal. **Major depressive affective disorder, single episode:** A state of depression with all the classic symptoms (anhedonia and lethargy and sleep disturbance and despondency and morbid thoughts and feelings of worthlessness and sometimes attempted suicide) but with no known organic dysfunction.

Alcohol/Drug Abuse Or Dependence (894-897)

Diagnoses: that frequently accompanied Alcohol/Drug Abuse Or Dependence were: 1) Opioid type dependence, unspecified (30400), 2) Alcohol withdrawal (29181), 3) Insomnia, unspecified (78052), 4) Opioid type dependence, continuous (30401), 5) Other malaise and fatigue (78079), 6) Tobacco use disorder (3051), 7) Drug withdrawal (2920), 8) Major depressive affective disorder, single episode, unspecified (29620).

Definitions: **Opioid:** A drug that has narcotic effects similar to opium (Papaver somniferum) but is not derived from it. **Insomnia:** A sleep disorder that is characterized by difficulty falling and/or staying asleep. **Malaise:** A condition of general bodily weakness or discomfort, often marking the onset of a disease. **Fatigue:** Physical and/or mental exhaustion that can be triggered by stress, medication, overwork, or mental and physical illness or disease. **Tobacco:** Herb of South American origin, Nicotiana tabacum, which has large ovate to lanceolate leaves; leaves contain 2-8% nicotine and are source of smoking tobacco, chewing tobacco, and snuff. **Major depressive affective disorder, single episode:** A state of depression with all the classic symptoms (anhedonia and lethargy and sleep disturbance and despondency and morbid thoughts and feelings of worthlessness and sometimes attempted suicide) but with no known organic dysfunction.

Rehabilitation With Complications (945)

Diagnoses: that frequently accompanied Rehabilitation With Complications were: 1) Atrial fibrillation (42731), 2) Chronic airway obstruction, not elsewhere classified (496), 3) Hyposmolality and/or hyponatremia (2761), 4) Esophageal reflux (53081), 5) Acute posthemorrhagic anemia (2851), 6) Depressive disorder, not elsewhere classified (311), 7) Coronary atherosclerosis of unspecified type of vessel, native or graft (41400), 8) Coronary atherosclerosis of native coronary artery (41401).

Definitions: **Atrial fibrillation:** An irregular and often very fast heart rate. The heart's two upper chambers (the atria) beat chaotically and irregularly - out of coordination with the two lower chambers (the ventricles) of the heart. **Chronic airway obstruction:** A type of pulmonary disorder, such as emphysema or chronic bronchitis, in which the upper or lower airway is chronically obstructed. **Hyposmolality:** The condition especially of a bodily fluid of having abnormally low osmolality. **Osmolality:** The concentration of a solution expressed as the total number of solute particles per kilogram. **Hyponatremia:** A deficiency of sodium in the blood. **Esophageal reflux:** Regurgitation of the contents of the stomach into the esophagus. **Reflux:** Backward flow of a substance. **Acute posthemorrhagic anemia:** A condition in which a person quickly loses a large volume of circulating hemoglobin. **Depressive disorder:** Any of a number of conditions characterized by one or more depressive episodes - major DD, depressed mood - dysthymic disorder and adjustment disorder with depressed mood, and those that do not fit the criteria of other conditions, aka, DD not otherwise specified. **Coronary atherosclerosis:** A hardening of the arteries, occurs when the normal lining of the arteries deteriorates, the walls of arteries thicken, and deposits of fat and plaque build up, causing narrowing (or even blockage) of the arteries.
